

# Tiny Window Cities

with Imagine If...

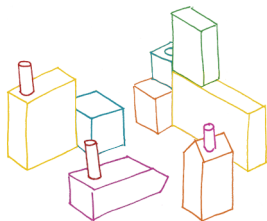

01

## 1. Find Your Building Blocks

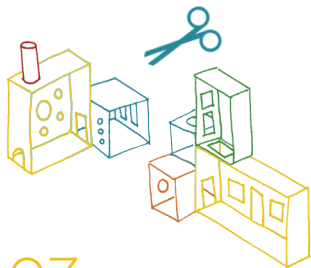

Have a look through your recycling and find two to three items made of cardboard. Things like juice cartons, cereal boxes and toilet rolls are perfect for this!

## 2. Start Stacking

Start stacking your shapes next to each other as if they are buildings in a street. Try and imagine what type of building each shape would be and who would live there!

02

## 3. Start Cutting!

Cut one side off each shape so you can create a front and a back. Then start cutting windows and doors in the side that will face your window.

Ask a responsible adult for some help.

03

## 4. Make a Character

Create a character, a simple cut out shape will do. It could be someone just like you or maybe an animal or imaginary creature!

04

## 5. Time to Decorate

Start adding some detail to your model to suit your character. Maybe some stairs, a roof or a chimney. You could also do some collaging to make your design stand out!

05

## 6. Finishing Touches

Finish sticking your creation together and then place it on the window sill so your characters can enjoy the view too!

You could use a torch or some fairy lights to light up your building when it is dark.
